- Ari Keränen, Ericsson
- Jens Schimmelpfennig, Software AG

Program Committee Process

- PC members should indicate their preference of categories they would like to review.
- Categories: Use Cases, Architecture, Information Model, Applications, Security+Privacy, Protocols, Semantics, Other IoT Standards
- Chairs will assign papers to reviewers taking preferences into account, where possible.
- PC should start review only after submission deadline (April 23th) has passed to give every proposal the same level of attention.
- Late submissions may be possible based on the number of proposals we receive.
- Review period is between April 23th and May 6th.
- Each document is reviewed by 2 members who provide their assessment in easychair and a brief justification.
- A session should take 30 minutes.
- PC members may submit their own proposal but may not review it.
- Review feedback is collected in easychair and discussed in phone conferences once a week.
- On May 15th the program is defined and position papers have been selected, participants are notified.

Timeline

- Initial PC call on 15.4.
- Submission deadline: 23.4.
- 2nd PC call: April 23rd , 3pm CEST– determine review criteria
- 3rd PC call: April 29th, same time?
- Review period is between April 23th and May 6th.
- Next PC call on May 6th to consolidate review feedback, draft agenda structure for the workshop.
- Final PC call on May 13th to decide on which presentations are selected and decide on agenda.
